Steel Nails.

We manufacture to order Steel Nails of the same styles and sizes with Iron Nails, or special styles when required. The attention of consumers of Steel Nails is called to the fact that unless these are properly made, and from suitable steel, they retain a portion of their temper, and although stiff, are quite brittle.

The Steel Nails of the Tremont Nail Co. are strong, stiff, and exceedingly durable, and are confidently recommended for use wherever either of these qualities is required in an unusual degree. The price of steel nails made from No. 15 plate, (Stubbs' gauge) or thicker, is $1.00 per keg above the price of the same sizes of common nails. Special prices made for lighter nails upon application.
